## FULL CD DISC LABEL SPECIFICATIONS

### DISC LABEL SPECIFICATIONS

CD Size: 120mm  
Printable Area: 117mm  
Stacking Ring: None  
Center No Print: 20mm

- All fonts & images must be included with the art file and saved on disk or converted to outlines. Embedding images and fonts is recommended.
- Artwork may bleed outside the blue (no print areas) if being sent electronically, however, no art may appear outside the printable area or over the center hole (blue areas) when film is developed. Make a "Clipping Mask" to eliminate artwork that falls outside the print area.
- Resolution of film output should be 1200 x 2400 and 100 lpi for Pantone colors or 133 lpi for process. Offset printing resolution should be 185 lpi.
- Film for silk screen is positive, emulsion side up, right reading.
- Film for offset is negative, emulsion down, right reading.
- Keep all registration marks and color keys.
- To ensure accurate color matching, provide a hard copy color proof with this file.
